Chief editor comment on "Effects of point source emission heights in WRF-STILT: a step towards exploiting nocturnal observations in models" by Fabian Maier et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-386-CEC3>, 2022

Dear authors,

Let me see if I understand correctly what you are saying. What you say is that you can not share the code that you have developed by the simple fact that you include it in STILT/HYSPLIT? And you have signed an agreement with NOAA transferring them your intellectual property rights on the code?

That is what I understand from your explanation. If it is the case, I would need to discuss this situation with the other executive panel members to decide if we can accept this or not.

Juan A. Añel
