Comment on gmd-2021-389

Yuanhong Deng

Community comment on "Soil-related developments of the Biome-BGCMuSo v6.2
terrestrial ecosystem model" by Dóra Hidy et al., Geosci. Model Dev. Discuss.,
<https://doi.org/10.5194/gmd-2021-389-CC1>, 2021

It is a very nice job. I want to know 1) the main differences between Biome-BGCMuSo
v6.1 and Biome-BGCMuSo v6.2

2) whether the Biome-BGCMuSo v6.2 can simulate the hydrological process in frozen soils
such as Qinghai Tibet Plateau with strong freezing-thawing cycle or what we should be
noticed when using the model in frozen soils.
