Comment on gmd-2021-415

Juan Antonio Añel

Chief editor comment on "Efficient high-dimensional variational data assimilation with machine-learned reduced-order models" by Romit Maulik et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-415-CEC1>, 2022

After checking your manuscript, it has come to our attention that it does not comply with our Code and Data Policy.

https://www.geoscientific-model-development.net/policies/code_and_data_policy.html

We can not accept embargoes such as registration or previous contact with the authors to get access to data or code. Therefore, please, to be able of considering your paper for publication you must publish the code and data that you have used for your work in one of the appropriate repositories according to our policy.

In this way, you must reply to this comment with the link to the repository used in your manuscript, with its DOI. We understand that some files used in your study can be large (e.g., full output from models). In such cases, instead of storing the complete files, you should at least keep the variables or final fields computed and used in your work.

Also, you must include in a potential reviewed version of your manuscript the modified 'Code and Data Availability' section and the DOI of the code and data repository.

Please, when publishing the code, be aware that If you do not include a license, the code continues to be your property and can not be used by others, despite any statement on being free to use. Therefore, when uploading code, you could want to choose a free software/open-source (FLOSS) license. We recommend the GPLv3. You only need to include the file '<https://www.gnu.org/licenses/gpl-3.0.txt>' as LICENSE.txt with your code. Also, you can choose other options that Zenodo provides: GPLv2, Apache License, MIT License, etc.

Please, reply as soon as possible to this comment with the link for it so that it is available for the peer-review process, as it should be.
