Comment on gmd-2021-429

Juan Antonio Añel

Chief editor comment on "Evaluation of WRF-Chem model (v3.9.1.1) real-time air quality forecasts over the Eastern Mediterranean" by George K. Georgiou et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-429-CEC1>, 2022

Dear authors,

After checking your manuscript, it has come to our attention that it does not comply with our Code and Data Policy.

https://www.geoscientific-model-development.net/policies/code_and_data_policy.html

You have archived your code in GitHub. However, GitHub is not a suitable repository. GitHub itself instructs authors to use other alternatives for long-term archival and publishing, such as Zenodo. Therefore, please, publish your code in one of the appropriate repositories according to our policy.

Moreover, about the data: we can not accept embargoes such as registration or previous contact with the authors to get access to code and data. We understand that some files used in your study are large (e.g., full output from models). In such cases, instead of storing the complete files, you should at least keep the variables or final fields computed and used in your work.

Therefore, you must reply to this comment with the link to the repository used in your manuscript, with its DOI. Also, you must include in a potential reviewed version of your manuscript the modified 'Code and Data Availability' section and the DOI of the code.

Please, reply as soon as possible to this comment with the link for it so that it is available for the peer-review process, as it should be.

Regards,

Juan A. Añel
Geosci. Model Dev. Exec. Editor
