Author comment on "Using terrestrial laser scanning to constrain forest ecosystem structure and functions in the Ecosystem Demography model (ED2.2)" by Félicien Meunier et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-59-AC3>, 2021

Dear Juan A. Añel,

We would like to apologize for not complying with the code and data policy of GMD. The new version of the manuscript will include the links and DOIs of the Zenodo repositories for both the ED2 model and all the scripts and data that are necessary to repeat the analyses.

On behalf of all co-authors,

Félicien Meunier
