Author comment on "Spatial agents for geological surface modelling" by Eric A. de Kemp,
Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-66-AC2>, 2021

Guillaume,

A big thank you for spending the time to look at my paper. I agree with all your corrections and will implement the improvements. I am happy that you are in the structural geology and tectonics field and see the applicability for agents to make a contribution, even though we may be far off from fully functional applications. I will be updating the manuscript and submitting the revision in the days ahead.

Regards,

Eric A. de Kemp
