Author comment on "Comparison of ocean heat content from two eddy-resolving hindcast simulations with OFES1 and OFES2" by Fanglou Liao et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-95-AC2>, 2021

Dear Dr. Wang

Thank you very much for kindly handling our manuscript gmd-2021-95. We have now revised our manuscript following the constructive comments from you, the reviewer and the Executive Editor. I noticed that it is suggested not to submit the revised manuscript by posting a comment. Therefore, I only submit our response letters as supplements here. May I ask shall we only be able to submit a revised manuscript after the discussion phase?

Thank you very much again

Kind regards,

Please also note the supplement to this comment:
