Author comment on "Performance analysis of regional AquaCrop (v6.1) biomass and surface soil moisture simulations using satellite and in situ observations" by Shannon de Roos et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-98-AC1>, 2021

Dear Juan A. Añel,

Thank you for your comment. The code and access details were provided in the cover letter submitted together with the manuscript, diligently following the requirements to comply GMD core principle "2". However, to avoid any delay in the review process, we also provide the data and code on Zenodo with DOI: [10.5281/zenodo.4770738](https://doi.org/10.5281/zenodo.4770738)

The DOI will be added to the revised manuscript.

Kind regards,

Shannon de Roos
