Comment on gmd-2021-98

Juan Antonio Añel

Chief editor comment on "Performance analysis of regional AquaCrop (v6.1) biomass and surface soil moisture simulations using satellite and in situ observations" by Shannon de Roos et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2021-98-CEC1>, 2021

Dear authors,

After checking your manuscript, it has come to our attention that your submission and "Code and Data Availability" section, unfortunately, does not comply with our policy.

https://www.geoscientific-model-development.net/policies/code_and_data_policy.html#item3

You state that the code and data used for your study will be made available upon publication of your work. Therefore, it is clear that nothing prevents you from publishing it. We are a journal with an open review system, this is the real meaning of the Discussions stage, and the reviewers are not only those requested by an editor but any member of the community that wants to post a comment on your work. To do it, the assets of your work must be available during the Discussions stage.

Therefore, you must publish the code and data used in your work in one of the archives that we accept (see our policy). Otherwise, we can not continue with the peer-review process.

Best regards,

Juan A. Añel

Geosc. Mod. Dev. Executive Editor
