Comment on gmd-2022-1

David Martín Belda et al.

Author comment on "LPJ-GUESS/LSMv1.0: a next-generation land surface model with high ecological realism" by David Martín Belda et al., Geosci. Model Dev. Discuss., https://doi.org/10.5194/gmd-2022-1-AC3, 2022

The original simulations were run with wild fires turned on. In order to avoid any contributions from fire to calculated NEE at the measurement sites, we rerun all the simulations with fire turned off.
