Comment on gmd-2022-105

Astrid Kerkweg

Chief editor comment on "Impact of the numerical solution approach of a plant hydrodynamic model (v0.1) on vegetation dynamics" by Yilin Fang et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2022-105-CEC1>, 2022

Dear authors,

in my role as Executive editor of GMD, I would like to bring to your attention our Editorial version 1.2: <https://www.geosci-model-dev.net/12/2215/2019/>

This highlights some requirements of papers published in GMD, which is also available on the GMD website in the 'Manuscript Types' section: http://www.geoscientific-model-development.net/submission/manuscript_types.html

In particular, please note that for your paper, the following requirements have not been met in the Discussions paper:

- "The main paper must give the model name and version number (or other unique identifier) in the title."

Thus please add the name of "the plane hydrodynamical model", FATES-HYDRO , and the version number of the model code used for this publication to the title of your manuscript.

Yours, Astrid Kerkweg
