Author comment on "Inclusion of a cold hardening scheme to represent frost tolerance is essential to model realistic plant hydraulics in the Arctic–boreal zone in CLM5.0-FATES-Hydro" by Marius S. A. Lambert et al., Geosci. Model Dev. Discuss.,
<https://doi.org/10.5194/gmd-2022-136-AC1>, 2022

Dear Tim Artlip,

We thank you for your constructive criticism and invite you to look at our responses in the attached document.

Regards,

Marius Lambert on behalf of all authors
