In Line 327, 331 and 347, we incorrectly left "0.5% of water depth" in the manuscript without actually showing the result in Table 3. This is because at the beginning of the experiment, we did calculate the result of 0.5% of water depth, but in later discussions, we decided to remove this criterion and leave only the 2% and 1% of water depths. We apologize for any misunderstandings that may have been caused by this minor error.
