Comment on gmd-2022-237: reference

Jorn Van de Velde

Community comment on "Evaluation of bias correction methods for a multivariate drought index: case study of the Upper Jhelum Basin" by Rubina Ansari et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2022-237-CC1>, 2022

Dear authors,

Although the paper seems interesting, I don't have the time to read it in full. However, I was notified that you cite one of my papers, although you refer to the original preprint. It seems scientifically better to refer to the final, peer-reviewed version of the paper: <https://hess.copernicus.org/articles/26/2319/2022/>.

Kind regards,

Jorn Van de Velde
