## **Comment on gmd-2022-31**

Juan Antonio Añel

---

Chief editor comment on "Importance of different parameterization changes for the updated dust cycle modeling in the Community Atmosphere Model (version 6.1)" by Longlei Li et al., Geosci. Model Dev. Discuss.,  
<https://doi.org/10.5194/gmd-2022-31-CEC1>, 2022

---

Dear authors,

After checking your manuscript, it has come to our attention that it does not comply with our Code and Data Policy.

[https://www.geoscientific-model-development.net/policies/code\\_and\\_data\\_policy.html](https://www.geoscientific-model-development.net/policies/code_and_data_policy.html)

You have archived your code in GitHub. However, GitHub is not a suitable repository.

GitHub itself instructs authors to use other alternatives for long-term archival and publishing, such as Zenodo. Therefore, please, publish your code in one of the appropriate repositories, and include the relevant primary input/output data.

Also, we can not accept embargoes such as publication only after acceptance, registration or previous contact with the authors. You must publish the assets used during the review process too.

In this way, you must reply to this comment with the link to the suitable repository used in your manuscript and containing all the materials used (code and data) with its DOI.

Moreover, you must include in a potential reviewed version of your manuscript the modified 'Code and Data Availability' section and the DOI of the code.

Please, reply as soon as possible to this comment with the link for it to continue with the peer-review process for your manuscript.

Regards,

Juan A. Añel

Geosci. Model Dev. Exec. Editor
