Comment on gmd-2022-4

Juan Antonio Añel

Chief editor comment on "Spatial heterogeneity effects on land surface modeling of water and energy partitioning" by Lingcheng Li et al., Geosci. Model Dev. Discuss., https://doi.org/10.5194/gmd-2022-4-CEC1, 2022

Dear authors,

After checking your manuscript, it has come to our attention that it does not comply with our Code and Data Policy.
https://www.geoscientific-model-development.net/policies/code_and_data_policy.html
You have archived your code on GitHub. However, GitHub is not a suitable repository. GitHub itself instructs authors to use other alternatives for long-term archival and publishing, such as Zenodo (GitHub provides a direct way to copy your project to a Zenodo repository). Therefore, please, publish your code in one of the appropriate repositories according to our policy.
In this way, you must include in a potential reviewed version of your manuscript the modified 'Code and Data Availability' section, including the DOI of the code.
Also, the repositories you provide for data (NCAR and NASA servers) do not comply with our policy. I understand that you could not be the owner of the data, and therefore you could not have the right to copy them to one of the repositories acceptable. However, I would ask you to contact the responsible for such repositories and ask them to store a copy in a suitable one or that they permit you to do it. By the way, the hyperlinks to the repositories included in the manuscript are wrong. You have included at the end of both an extra ";"; therefore, when somebody tries to open them, they do not work.
Please, reply as soon as possible to this comment with the link and DOI for the new repositories so that they are available for the peer-review process, as they should be.

Juan A. Añel

Geosci. Model Dev. Executive Editor
