Comment on gmd-2022-76

Andrew Geiss et al.

___

Author comment on "Downscaling atmospheric chemistry simulations with physically consistent deep learning" by Andrew Geiss et al., Geosci. Model Dev. Discuss., https://doi.org/10.5194/gmd-2022-76-AC2, 2022

___

I have fixed an incorrect label in the video supplement. Here is an updated youtube link for easier viewing (I recommend setting HD playback): https://youtu.be/QL_onStfd90

I also generated a permanent Zenodo link to the video supplement: https://doi.org/10.5281/zenodo.6506306

These will be added to a future version of the manuscript.
