Comment on gmd-2022-79

Andrew Yool (Editor)

Editor comment on "Non-Redfieldian carbon model for the Baltic Sea (ERGOM version 1.2) – implementation and budget estimates" by Thomas Neumann et al., Geosci. Model Dev. Discuss., <https://doi.org/10.5194/gmd-2022-79-EC1>, 2022

Dear Authors,

Your manuscript has received two referee reports and the discussions phase has concluded.

Both reports make a number of recommendations for improvements for your manuscript. However, one referee report raises a number of critical points and recommends that, in its current form, the manuscript is rejected.

Before making a decision on the next step, I would like to see your response to the comments and criticisms raised by your referees. Where this requires additional work or extensive revision, you may wish at this stage to outline these changes rather than undertake time-consuming extra work.

Please feel free to contact me should you require any clarification or further guidance.

With best regards,

Andrew Yool.
