Referee comment on "Critical transitions in the hydrological system: early-warning signals and network analysis" by Xueli Yang et al., Hydrol. Earth Syst. Sci. Discuss.,
<https://doi.org/10.5194/hess-2021-120-RC2>, 2021

The authors have answered all my questions and have done a good job revising the manuscript. Therefore I have no further comments and would recommend acceptance.
