Comment on hess-2021-127

Alison Kay

Community comment on "Benchmarking data-driven rainfall–runoff models in Great Britain: a comparison of long short-term memory (LSTM)-based models with four lumped conceptual models" by Thomas Lees et al., Hydrol. Earth Syst. Sci. Discuss., https://doi.org/10.5194/hess-2021-127-CC1, 2021

The NS values for CLASSIC-GB reported in Table 4 are misleading, as they are for a preliminary test version of the model, not the final version as reported later in Crooks et al. (2014).
