Comment on hess-2021-189

Anonymous Referee #1

Referee comment on "The value of satellite soil moisture and snow cover data for the transfer of hydrological model parameters to ungauged sites" by Rui Tong et al., Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2021-189-RC1>, 2021

I generally like the approach and methodology, but some moderate improvements are needed. I hope the authors find my comments useful and I am looking forward to an improved version of the manuscript.

Please also note the supplement to this comment:
