Editor comment on "Towards disentangling heterogeneous soil moisture patterns in Cosmic-Ray Neutron Sensor footprints" by Daniel Rasche et al., Hydrol. Earth Syst. Sci. Discuss., https://doi.org/10.5194/hess-2021-202-EC1, 2021

Dear Authors:

So far your submission received four appraisals and therefore I do suggest you should start posting your preliminary responses in order to feed the discussion step of the journal.
