Referee comment on "Towards hybrid modeling of the global hydrological cycle" by Basil Kraft et al., Hydrol. Earth Syst. Sci. Discuss., https://doi.org/10.5194/hess-2021-211-RC3, 2021

Thanks for the new version of the Figures.

In Figure 10, CWD is indicated as one of the 3 considered variables, while the Figure itself shows SM.

In the whole paper, there is a confusion between CWD and SM.

L. 249 ("We consider the dynamics of CWD to correspond to SM and thus, the terms are used interchangeably when talking about soil moisture dynamics"): has to be clarified.
