Referee comment on "Rediscovering Robert E. Horton's lake evaporation formulae: new directions for evaporation physics" by Solomon Vimal and Vijay P. Singh, Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2021-234-RC2>, 2021

Hereby I submit the review that was carried out by Femke Jansen, who works on open water evaporation as part of her PhD project. Having read the paper myself as well, I agree with her assessment.
