Editor comment on "Rainfall–runoff relationships at event scale in western Mediterranean ephemeral streams" by Roberto Serrano-Notivoli et al., Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2021-352-EC1>, 2021

The paper received two reviews, which both state that this paper is suitable for publication in HESS but that it requires revisions. These revisions should in particular clarify some methodological details and choices and better reference the work in existing literature on ephemeral streams.
