Referee comment on "Synthesizing the impacts of baseflow contribution on concentration–discharge (C–Q) relationships across Australia using a Bayesian hierarchical model" by Danlu Guo et al., Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2021-353-RC3>, 2021

Sorry for the display issue with the equation in my comment 10. Here is the correction:

Equations 2-3: Consider changing $\frac{Q_{base}}{Q_{total}} \cdot BFI$ to $\frac{Q_{base}}{Q_{total}} \cdot BFI_{climate}$ (Move "BFI" to the subscript.) At first glance, I thought this is the product of two variables ($\frac{Q_{base}}{Q_{total}}$ and BFI).
