Author comment on "Enhancing the usability of weather radar data for the statistical analysis of extreme precipitation events" by Andreas Hänsler and Markus Weiler, Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2021-366-AC1>, 2021

Dear Francesco Marra,

thank you very much for your valuable critics, remarks and suggestions in order to improve our manuscript. Please find our response to the various points you raised indicating what we adapted in the manuscript in the attached pdf (supplementary file).

Additionally, I would like to apologize for not being active in the open discussion during the review phase. The reason for this is that I was on parental leave, which actually started a bit earlier than was originally foreseen.

Best regards, also on behalf of my co-author,

Andreas Hänsler
