Comment on hess-2021-371

Dimitri Solomatine (Editor)

Editor comment on "Impact of spatial distribution information of rainfall in runoff simulation using deep learning method" by Yang Wang and Hassan A. Karimi, Hydrol. Earth Syst. Sci. Discuss., https://doi.org/10.5194/hess-2021-371-EC1, 2021

I think the referees have provided very thoughtful and constructive comments. In their replies the authors have shown how to address these comments in the subsequent revision of the paper. This discussion was useful. I can recommend the paper to proceed to the next stage, and wish the authors success.
