Community comment on "Advances in the Hydraulic Interpretation of Water Wells Using Flowmeter Logs" by Jesús Díaz-Curiel et al., Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2021-380-CC3>, 2021

The authors introduce an interesting approach for a new hydraulic interpretation of flowmeter logs. The methodology was implemented using a case study a well located in the Madrid Basin. In my opinion, it would be advisable to validate the results using other and different case study examples.
