Editor comment on "Disentangling sources of future uncertainties for water management in sub-Saharan river basins" by Alessandro Amaranto et al., Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2021-40-EC1>, 2021

Reviewers' comments were quite useful, and the authors provided extensive answers and clarifications (and also rebuttal to some points), making it clear how the manuscript will be revised. The paper can move to the next stage, so I invite the authors to work on the revision.
