Author comment on "Technical note: Efficient imaging of hydrological units below lakes and fjords with a floating, transient electromagnetic (FloaTEM) system" by Pradip Kumar Maurya et al., Hydrol. Earth Syst. Sci. Discuss.,
<https://doi.org/10.5194/hess-2021-540-AC2>, 2022

Dear Michael

We are aware that the color scheme used in the paper is not very suitable for people affected with CVD. Unfortunately this is what supported in the software that was used for data analysis and interpretation and to generate figures. Would you be able to provide/suggest a color scheme suitable for CVD affected people, so that I can request the software vendor to incorporate and I can use for my future works.

Regards

Pradip Maurya
