Referee comment on "Development and validation of a new MODIS snow-cover-extent product over China" by Xiaohua Hao et al., Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2021-556-RC5>, 2022

Thank the authors improving the manuscript according to the reviewers' comments. Most of the points has been revised, but I still have doubts on two points. One is that the OE and CE are not need to show if you use PA and UA, and PA and UA are not need to show if you use OE and CE, in Table 3, 4, 5, and 6. The other is that I suggest to use "snow-free" in the figure 1, 2, 3, 4, and 6, not "non-snow", in order to keep the same as that in the text.
