Comment on hess-2021-647

Anonymous Referee #2

Referee comment on "Socio-hydrology, politicization of water science and implication of the Eyes on Earth Study on the contemporary research dialogue in the Lancang-Mekong Basin" by Richard Grünwald et al., Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2021-647-RC2>, 2022

The article focuses on the Eyes on Earth Study which can be seen as a typical reflection of politicization of water science, revealing the forming process and Socio-hydrological mechanism of politicization impacting scientific research dialogue. The author has performed detailed analysis based on review of contemporary literatures on research dialogue in the Lancang-Mekong River Basin. The results are reliable, but the way of displaying and describing the results needs to be further improved. A major revision is suggested.
