## Some oversights in hess-2021-7

Demetris Koutsoyiannis and Nikos Mamassis

---

Author comment on "From mythology to science: the development of scientific hydrological concepts in Greek antiquity and its relevance to modern hydrology" by Demetris Koutsoyiannis and Nikos Mamassis, Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2021-7-AC2>, 2021

---

We found several oversights in the manuscript, among which most serious is the mentor's name in line 739; the correct name is Luzin, not Egorov. (Egorov's story is also fascinating and is contained in the book by Graham and Kantor, 2009, too).

In the opening Chinese quotation in line 26, the English translation given corresponds to merely the first four-Chinese-character group. (The second four-character group is translated as "but to pursue appearances is to miss the source"; <https://terebess.hu/english/hsin1.html> ). We are grateful to John Ding for spotting this and writing to us, and to Lei Ye for his further explanations.

Other corrections:

lines 105-106: "as clearly seen in the above excerpt" should be deleted to avoid repetition.

lines 227 and 417: Cesar □ Caesar

line 306: effective interpretation □ effective interpretation of quantum physics

line 394: later authors □ other authors

line 420: one □ one is

lines 583-684: "that determine the long-term changes of the climate" should be placed in the end of the next sentence.

line 989: but they not □ but they do not

footnote on p. 27: there is original sign □ there is no original sign
