Wei-quan Dong (Referee)

Referee comment on "Transit Time index (TTi) as an adaptation of the humification index to illustrate transit time differences in karst hydrosystems: application to the karst springs of the Fontaine de Vaucluse system (southeastern France)" by Leïla Serène et al., Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2022-100-RC3>, 2022

My comments and remarks on the pre-print were well addressed and I don't have additional comments and the revised pre-print version is acceptable to be published.

Thanks,

Wei-quan Dong
