Edward Le et al.

Author comment on "Snow persistence is associated with stream high-flow and low-flow signatures with differing relationships by aridity and climatic seasonality" by Edward Le et al., Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2022-106-AC1>, 2022

Thank you for the encouraging comments. We have attached a .pdf file with our responses for how we would address each suggestion and how we would improve the manuscript

Please also note the supplement to this comment:
