Author comment on "First implementation of a new cross-disciplinary observation strategy for heavy precipitation events from formation to flooding" by Andreas Wieser et al., Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2022-131-AC2>, 2022

---

The authors thank Dr. Rolf Hut for the valuable comments and his thoughtful review including recommendations to improve our manuscript. Based on his comments and the comments of reviewer 1, we are going to prepare a revised and shortened manuscript that (among other changes) we expect to be more focused on the main topics of the study.

Our detailed responses to the individual comments and suggestions are attached as pdf document.

Please also note the supplement to this comment:
