Editor comment on "Numerical modeling of physical and biochemical processes in the subsurface and their impacts on the self-potential signature" by Xin Liu et al., Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2022-31-EC1>, 2022

Dear Prof. Revil,

The authors replied in detail to your comments. HESS permits comment to be published as supplements to allow more flexibility in the formatting. The reply by the authors contains color figures, extensive text in different fonts, etc., so they had no choice but to place their reply in a supplement.

Thank you,

Gerrit de Rooij
