Author comment on "Strengthening interdisciplinary water research – learnings from sports team management" by Maija Taka et al., Hydrol. Earth Syst. Sci. Discuss., <https://doi.org/10.5194/hess-2022-85-AC1>, 2022

Dear Dr. Mostert,

on behalf of all authors, I sincerely thank you for your careful reading and constructive comments on our manuscript.

Based on your comments we will make major revisions to the manuscript, including:

1. Overall rewriting of the work, including descriptions of the project, used methods, and a more critical assessment of the sports team framework,
2. Reporting the sports literature review and the method description in a more systematic way,
3. Restructuring the Results and Discussion to align Tuckman's model more strongly.

These and other revisions are described in detail in our point-by-point replies to the comments in the supplementary pdf file.

Yours sincerely,

Maija Taka

Please also note the supplement to this comment:
