Author comment on "History of the Tromsø ionosphere heating facility" by Michael T. Rietveld and Peter Stubbe, Hist. Geo Space. Sci. Discuss.,  
<https://doi.org/10.5194/hgss-2021-19-AC2>, 2022

---

We thank the referees for their comments.

In response to referee 2, we have incorporated all suggestions made.

Line 35: We believe this form of reference to a whole journal issue is correct.

Line 53: Dipl. Phys. is explained in parentheses.

In line 251, "guy" is indeed correct. Among other meanings it includes: "A rope, cord, or cable used to steady, guide, or secure something. tr.v. guyed, guy·ing, **guys** To steady, guide, or secure with a rope, cord, or cable. [Partly from Middle English gie, guide, **guy** (from Old French guie, from guier, to guide; see weid- in Indo-European roots) ([www.thefreedictionary.com](http://www.thefreedictionary.com))

Line 259: The units of the frequency range were omitted. They have now been inserted.
