Author comment on "Determination of hydrogen exchange and relaxation parameters in PHIP complexes at micromolar concentrations" by Lisanne Sellies et al., Magn. Reson. Discuss., <https://doi.org/10.5194/mr-2021-23-AC2>, 2021

We appreciate the positive judgment about our manuscript. As suggested by the reviewer, the pulse sequence (Varian/Agilent) has been made available together with the raw and processed data as supplemental material. Further, a sketch of the experimental setup has been added as Appendix A.
