Author comment on "Insights into Protein Dynamics from <sup>15</sup>N-<sup>1</sup>H HSQC" by Erik R. P. Zuiderweg, Magn. Reson. Discuss., https://doi.org/10.5194/mr-2021-30-AC2, 2021

Dear Jorg,

This is dissapointing, but I would have been surprised if you could have put the review of the Editor-in-Chief to the side. It is too bad that the perfect has once more become the enemy of the good. I would like to keep the manuscript posted, with all comments. In that way, others may still learn from the idea and see differences in scientific philosophy exposed.
