## **Comment on mr-2021-46**

Paul Schanda (Editor)

---

Editor comment on "Rapid measurement of heteronuclear transverse relaxation rates using non-uniformly sampled  $R_{1\rho}$  accordion experiments" by Sven Wernersson et al., Magn. Reson. Discuss., <https://doi.org/10.5194/mr-2021-46-EC2>, 2021

---

Related to my previous comment regarding deposition of pulse sequence codes: in case your institution does not have a repository (listed on <https://www.re3data.org/>), then you might use zenodo (<https://zenodo.org/>).

Ideally, please deposit Varian and Bruker codes (in case you have them, of course).  
Thanks.
