Author comment on "The Lindbladian form and the reincarnation of Felix Bloch's generalized theory of relaxation" by Thomas M. Barbara, Magn. Reson. Discuss., <https://doi.org/10.5194/mr-2021-50-AC1>, 2021

Thanks for the update on Paul Hubbard. In April 2020 I tried to track down Paul and send him a copy of my effort. Charlie Johnson gave me his email. I did not hear back from him on that, and of course I wondered about his health. It would have been interesting to hear from him and I am sure he would have enjoyed learning about the new found interest in a topic related to his work of long ago. This is a lesson I learned long ago, when I would always see I.I. Rabi having a coffe at the bar at Chock full of Nuts at 116th street. And I often wanted to approach him and even invite him to come up to the lab were Ben Dailey and I were building a spectrometer, but I was too shy. I always regreted that.
