Author comment on "Spin noise gradient echoes" by Victor V. Rodin et al., Magn. Reson. Discuss., <https://doi.org/10.5194/mr-2021-55-AC1>, 2021

---

Thanks for the constructive comments, we are working on clarifying the issues. There are a few formatting problems with the review, as displayed in the Copernicus system. Could you please make a pdf version available to us (the authors)?

Some misformatted text has been highlighted in the attached pdf-file, but there could be more issues with special characters.

With kind regards

Norbert Müller
