Editor comment on "Magnetic expression in kerogen reveals impact on fluid transport" by Benjamin Nicot et al., Magn. Reson. Discuss., https://doi.org/10.5194/mr-2022-7-EC1, 2022

Since one of the reviewers is not convinced that “magnetic locking” has been proven to occur, I wonder if the paper could be re-written in a more sober manner, avoiding the expression "magnetic locking" altogether, which indeed seems to be a "buzzword" as the reviewer called it.
