Comment on nhess-2020-416
Francesco Serinaldi

Community comment on "Evaluating Spatiotemporal Patterns and Trends of Drought in Japan Associated with Global Climatic Drivers" by Ke Shi et al., Nat. Hazards Earth Syst. Sci. Discuss., https://doi.org/10.5194/nhess-2020-416-CC1, 2021

The Authors may be interested in the paper below, showing that TFPW-MK test used in this study suffers from mathematical inconsistencies that affect its effective significance, and make results and their interpretation generally incorrect.

The Authors may also be interested in the discussion reported in

and references therein.

Sincerely,

Francesco Serinaldi
