Author comment on "Flood and drought risk assessment for agricultural areas (Tagus Estuary, Portugal)" by Paula Freire et al., Nat. Hazards Earth Syst. Sci. Discuss.,
<https://doi.org/10.5194/nhess-2020-422-AC2>, 2021

Following this comment, that we thank, further details will be added to the discussion about figures 3 and 4. Figure 4 will also be corrected since the colour scheme for the weeks was not in accordance with the figure's caption. The captions of Figures 3 and 4 will also be improved for clarity.
