Comment on nhess-2021-105

Hugues Brenot et al.

Author comment on "EUNADICS-AV early warning system dedicated to supporting aviation in the case of a crisis from natural airborne hazards and radionuclide clouds" by Hugues Brenot et al., Nat. Hazards Earth Syst. Sci. Discuss.,
<https://doi.org/10.5194/nhess-2021-105-AC4>, 2021

Good afternoon dear Editor,

After the answer to RC1, RC2, and CC1 that really to improve the manuscript, I realise I should add 2 new authors from INGV in this paper (Giuseppe Salerno, Simona Scollo). These new authors contribute to this manuscript and specially help to answer to CC1.

With respect to RC1, RC2, and CC1, the manuscript has been modified (improvements) and the names and affiliations of the 2 new co-authors added. I hope this is OK for you.

Best regards,

Hugues Brenot
