Author comment on "Evolution of the Tazones Lighthouse slope (Cantabrian coast, N Spain). Multidisciplinary monitoring between 2018 and 2020" by María José Domínguez-Cuesta et al., Nat. Hazards Earth Syst. Sci. Discuss.,
<https://doi.org/10.5194/nhess-2021-16-AC2>, 2021

We thank Anonymous Referee #2 for his/her revision. We really appreciate the comments and suggestions. We will include the suggested amendments in our point-by-point response on which we are currently working. In the revised version of the manuscript, we will try to clarify and explain in detail those parts that raise doubts to avoid misunderstandings.
